

Aerospace Composites Manufacturing Job Growth in Atmore, Alabama

For Immediate Release

Contact: Jennifer Chism, 251-446-4508

jenchism@pcicie.com

Atmore, Alabama- March 19, 2018- It's an exciting time to be involved with the Poarch Band of Creek Indians especially if you work for Muskogee Technology (MT), an entity of Creek Indian Enterprises Development Authority (CIEDA). Muskogee Technology is growing and will hosting a job fair from 4:30pm- 7pm on April 12, 2018.

MT has been working with GKN Aerospace as a strategic partner for the last 3-4 years by providing custom cut composite materials to GKN Tallassee for their production of the Honda Jet's fuselage. To initiate this operation, Muskogee Technology heavily invested capital in construction and equipment to perform Pre-preg services, commonly referred to as "pre-impregnated composite fiber", manufacturing processes. Composite materials have unique properties that when used in aerospace manufacturing make the aircraft stronger, more durable and lightweight.

To perform these services for the aerospace industry, a Clean Room is necessary. The Clean Room is a controlled space kept free from dust and FOD (foreign objects and disposal) such as hair. These precise compliance measures are critically important to ensure the manufacturing process remains pristine. Our Composites Department Team Members understand they are processing composite fiber materials that will be utilized to transport commercial and private jet passengers. Additionally, they know that the quality of products they deliver directly correlates to the safety of those passengers and the general public.

MT's continued success in working in the composite fiber market has resulted in expanded services in direct relation to aerospace industry growth. These opportunities translate into a significant increase in job opportunities offered at Muskogee Technology. Approximately, 20 new job positions are anticipated to be added to MT's Composites Operations Department between April and June 2018. Additional job positions within MT's Machining and Fabrication Departments are also being filled. Apply online to these jobs at www.ciejobs.com.

To expedite the hiring process for these positions, a job fair is scheduled to be held on Thursday, April 12, 2018 at Muskogee Technology located at 601 Muskogee Blvd. Atmore, AL 36502. Prospective applicants are invited to see the inside the manufacturing plant and have onsite interviews with team leadership.

The job fair will begin accepting applications onsite at 4:30pm. Staff will be on hand to assist individuals with the application process. The job fair will last until 7pm.

Applicants are invited to fill out an application prior to the event. At any time, applications can be downloaded and printed from www.CIEjobs.com, or applications may be picked up in person at Creek Indian Enterprises Development Authority (CIEDA) located at 100 Brookwood Rd. Atmore, AL 36502.

All of Muskogee Technology's open positions are listed on the www.CIEjobs.com website. Applicants are encouraged to review these job positions before the job fair to ensure they meet the minimum requirements shown for each job posting. Key officials from Muskogee Technology will be holding mini interviews during this job fair. Prospective applicants are encouraged to be prepared to talk about their work experience and qualifications.

For applicants who are unable to attend the job fair, they may still be considered for these positions by applying online at ww.ciejobs.com.

About Muskogee Technology (MT)

Muskogee Technology provides a variety of services to meet the needs of the aerospace, defense, heavy machinery, wind energy, and oil and gas industries. Services include composite fiber cutting and kitting, inventory management, metal fabrication, precision machining, and manufacturing. Muskogee Technology is an entity of Creek Indian Enterprises Development Authority and owned by the Poarch Band of Creek Indians, a federally recognized Indian tribe located in the state of Alabama.

About Creek Indian Enterprises Development Authority (CIEDA)

The Poarch Band of Creek Indians operates a variety of economic enterprises, which employ hundreds of tribal members and area residents. Creek Indian Enterprises Development Authority, the economic development arm of the Tribe, manages tribal community-owned enterprises representing a diverse collection of industries including entertainment, food service, manufacturing, travel and retail. The enterprises overseen by CIEDA do not include any government services, nor gaming operations.
