Capabilities Statement

Corporate Overview

Muskogee Technology is a Tribally-owned, Small Disadvantaged Business (SDB), Disadvantaged Business Enterprise (DBE), Minority Business Enterprise (MBE), and Indian Economic Enterprise (IEE) aerospace manufacturing and service oriented business with ISO 9001/2015 and EN/JISQ/AS9100D Quality Management System certifications located in Atmore, Alabama. Muskogee Technology (formerly Muskogee Metalworks), has been in operation for over twenty years with its legacy services in manufacturing consisting of high quality CNC machined and fabricated products. In 2014, Muskogee Technology pivoted its business aspirations into the Aerospace Composites space which has since accelerated.

Muskogee Technology's capabilities consist of kitting, assembly, cold-storage warehousing, cutting, inventory management, and sub-zero logistics services. We utilize the latest technology of inventory management software with the Plataine inventory management wireless RFID system. Our services include both commercial and defense aerospace programs.

Our experience includes reverse engineering, modifying, qualifying, and manufacturing complex products to detailed AS9100D and Nadcap Composites specifications. We have successfully managed large multi-year programs requiring comprehensive management of schedules, costs and quality. Muskogee Technology has worked with strategic partners to develop and maintain technical data packages, provide configuration control, develop prototypes and first articles, as well as, plan and support tests and fabrication of the production units.

Muskogee Technology is strategically aligned and structured to manufacture and deliver quality parts on time, every time. Our senior staff is experienced and knowledgeable in the targeted markets; they are dedicated, committed and passionate about ensuring your project is a success.

Key Business Areas

Composite Cutting & Kitting

- (2) Eastman Eagle-S125 CNC Composite Cutting Machines with 6' x 64' static tables
- (2) Eastman Eagle-S125 CNC Composite Cutting Machines with 6' x 36' static tables
- Sub-Zero Cold Storage, 9,483 Sq. ft.
- Hino 26ft. Freezer Truck
- International 26ft Freezer Truck
- Caterpillar C27 800kw Generator

Clients Supported

Certifications

Muskogee Technology is a subdivision of the Poarch Band of Creek Indians and an affiliate of Poarch Creek Indian Federal Services. pcfederalservices.com
